

NITIN JADHAV

FRONT-END ENGINEER / ARCHITECT

Pune, India • +91 9623682301 • nitinjadhav@gmail.com • www.nitinj.com

Insightful front-end developer who cares about accessibility and performance. Builds beautiful, performant and highly usable frontends using cutting-edge tech. Experienced in Frontend architecture, migrating legacy apps to new tech stack, performance tuning and leading front-end teams. Takes pride in simplifying complex interfaces and mastering the craft. Possesses 13+ years of solid industry experience.

KEY SKILLS

Front-end: JavaScript / ES6+, TypeScript, React/ReactJS, Redux, HTML/HTML5, WebComponents, AngularJS, jQuery

Visual Design and Styling: I write semantic, standards-compliant HTML and scalable, modular styling using CSS (including CSS3), SASS & other CSS Pre-processors. I work with Flexbox and Grid Layouts, Responsive mobile-friendly design, Bootstrap and various other CSS frameworks

Accessibility and usability: I have experience with **WAI-ARIA**, **WCAG accessibility** standards and wide range of usability techniques.

Test Driven Development: I write unit and integration tests using **Enzyme**, **react-testing-library**, **protractor**, **Jasmine**, **Karma** among other tools. I have setup and used Cypress and Selenium for e2e testing.

Agile: I work with agile methodologies like scrum, sprints, stories etc. I use tools like JIRA, Confluence, Asana, Trello etc.

I have working knowledge of

- Web security techniques like XSS, CSRF, Content Security Policy (CSP)
- Various performance engineering and optimization techniques
- Authentication standards like JWT, Cookies
- Data visualization tools like eCharts, highcharts

As a senior developer, I have hands-on experience with

- **Managing developer teams** and owning products
- Setting up/configuring **build process** using webpack, grunt, etc
- Creating **Deployment strategy** for project using docker, nginx proxy and similar tools
- Managing **Git repositories**, Code reviews
- Managing **Production releases and Delivery**
- Supporting projects after release

Server technologies: Knowledge of Node JS, Java, MySQL, MongoDB, GraphQL, Docker

Creative Tools: Adobe XD & Creative Suite, Sketch and various wireframing and mock-up tools.
